STOREFRONT, CURTAINWALL & ENTRANCES  
**DEPENDABLE**

Date: **Date**

Engineering Bulletin: **030802**

Effective Date: **April 1, 2008**

Released By: **Nancy Kennedy**

Subject: **ThermI=Block® Thermal Doors and Frames**

Description: Tubelite is releasing a new product line of thermally broken doors and frames. The doors have a Medium stile dimension of 4" with a 4" top rail and a 10" bottom rail as standard. There are options for a 4" mid-rail and rabbet stiles for a continuous hinge application. The meeting stile on a pair of doors includes our improved adjustable astragal and standard weathering.

The thermal frame is similar our 14000 series storefront with a 2" face and 4-1/2" depth. The frame, like the door, is thermally broken utilizing an "I" shape strut that is reinforced with 25% nylon fiber. Each assembled extrusion must pass a shear test of 1000 lb minimum. This new line can be ordered with our standard and custom, anodized and paint colors.

Details and instructions can be viewed on the Tubelite web site:  
[http://www.tubeliteinc.com/product\\_types/ent\\_therml/ent\\_therml.html](http://www.tubeliteinc.com/product_types/ent_therml/ent_therml.html)

Thermal doors and frames are priced from the Custom Doors section (C1.1). List prices for blank doors and frames are as follows:
