CURTAINWALL AND ENTRANCE SYSTEMS

TUBELITE PRODUCT UPDATE: GASKET AND ISOLATOR / 900T & TU SYSTEMS

Beginning August 31, 2020, Tubelite will be making slight changes to our gasket product offering.

P4606 Gasket used with the 400TU & 400SS systems will change from a roll size of 250' to 500'.

P2728 Gasket used with our Storefront Glazing systems will include an additional option of a 500' roll (*P2728-500*). The 250' roll will still be available if preferred.

Minor pricing adjustments will also take effect on that date.

- Approximately \$2 net for the gaskets listed above, as well as a few other gaskets and isolator items.
- Approximately 4% increase for the 900RW systems, both thermal and ultra-thermal.

If you currently have open quotations or upcoming orders for the 900RW systems please contact your client development manager to discuss the best option for each individual project.

An updated *printed* version of the price book is currently in process and will include these updates along with other previously released systems and updates. Distribution date is yet to be determined.

The most updated version of the price book can be found on the client portal. A link on the top of the client portal home page will be available for quick visibility of recent price book changes. *shown below:*

Recent updates include:

- Zone 3 Hurricane Doors and Frames
- INT67 Interior Wall System
- Updated Storefront Setting Blocks
- Single Blade Sunshades

As always, we appreciate your business and thank you for your continued support.

Yours truly,

Mary Avery
Vice President of Marketing
