TUBELITE®

DEPENDABLE

Tubelite's P4543 and P4543A will be obsoleted and replaced by the recently added P2474. These are PVC fillers used at perimeters on 4-1/2" deep storefront systems.

Old inventory will be depleted by end of July. Tubelite's online Price Book, EZ Estimate and Glazier Studio will be updated in the next couple days to switch over to using the P2474 in preparation for this change.

P2474 (new)

P4543 (obs.)

P4543A (obs.)
